

EXP 600 PLUS RACING BRAKE FLUID

Features:

- Developed for demands of professional racing
- Dry boiling point 626° F
- Resists aeration and compressibility
- Low moisture affinity
- DOT 4 rated

Wilwood formulated EXP 600 PLUS for our motorsports customers who needed a brake fluid that performed well, lap after lap. Exceeding Department of Transportation requirements, EXP 600 PLUS is DOT 4 rated, so it can legally be used in your high-performance street car as well.

Tested on the Track

Five hundred lap Stock Car races at Martinsville are the most grueling brake test in all of motorsports. The brakes are applied at least 1,000 times on track, plus pit stops, sustaining high heat and repeated high pressure. NASCAR, IRL, CART, ASA, IndyCar, SCCA, SCORE, NHRA, and a whole world of other oval, off-road, and road course racers also demand extreme performance from their brake systems. Wilwood EXP 600 PLUS has passed the test in every one of these series!

Stop after Stop

The most stringent test of any fluid is how well it performs after hundreds of heat and pressure cycles. If Wilwood EXP 600 PLUS brake fluid resists aeration and compressibility after weekends on the short track, you better believe it's excellent for a canyon road, autocross, or track day. EXP 600 PLUS has been proven by the pros to maintain a firm pedal feel and quick response.

Super for the Street

Racing brake fluids indeed need high boiling points, and EXP 600 PLUS has that, but it's just the start. For street use, where you don't flush the brakes every weekend, it has a low moisture affinity to slow water vapor absorption. The wet boiling point of 417° F is far above the DOT minimum and most generic fluids, for month after month of use.

Note:

Wilwood EXP 600 PLUS is DOT 4 rated for street use. Only use fresh fluid from an unopened bottle. Once opened, use immediately. Do not store opened bottles or reuse old fluid.
