

WILWOOD'S BP-30
compound SmartPads
are an all new formula
engineered for severe-
duty use in oval track,
road course, off-road,
and all types of high-
endurance competition.

PAD FEATURES

- High-friction, fade resistant, long-wear race compound formulated for hard-braking endurance racing
- Smooth, predictable engagement with linear response through the entire temperature range
- Use for road racing, all types of asphalt oval tracks, open-wheel, and high grip downforce cars with sustained hard, high-heat cycles
- Exceptional modulation qualities at all temperatures and pressures
- Best racing compound to prevent ABS actuation and lock-up on spec-category or DOT tread-wear tires
- Fully compatible with all types of iron, steel, SAS (Super Alloy Series), and titanium alloy rotors
