

Wilwood's new TA2 rotor mounting system provides the following competitive advantages over traditional mounting systems:

- Rotor assembly and installation is simplified by eliminating the rotor bolts and floating hardware
- A large, single internal snap-ring with replaceable rotor clips retain the rotor to the aluminum hat
- Assembly removes thermal distortion and all thermally generated stress from the rotor attachment points
- The rotor moves independently of the hat as it expands and contracts through the heat cycles
- Rotor stays flatter and runs truer, creating smoother, vibration-free performance coupled with longer life
- Application-specific proprietary iron alloy **Spec37** GT curved 48-vane dynamic mount lug rotors
- Rotors are available pre-bedded using Wilwood's in-house, state-of-the-art, computer-controlled dynamometer

ORDERING INFORMATION: TA2 GT Dynamic Lug Racing Hat & Rotor Assembly

PART NUMBER	DESCRIPTION
170-15518	Dynamic Lug Mount Hat
160-15561	12.19" Diameter 1.25" Width Spec37 GT 48 Curved Vane Rotor
160-15562	12.19" Diameter 1.25" Width Spec37 GT 48 Curved Vane Rotor
300-14912	Dynamic Lug Mount Snap Ring Kit with Wear Plates
