

Big Brake Kits for Select 2013-20 Honda Civics*

Wilwood engineered these front big brake kits around motorsports-proven **Superlite** calipers for select 2013-2020 Civic* models, in street or track trim.

Oversized iron alloy rotors with forged aluminum mounting hats and brackets are lighter than stock but still produce greater brake torque and less fade. Rigid, forged billet aluminum six piston calipers with less deflection provide increased clamping force and even pad wear.

Designed to work with OEM master cylinders, rear brakes and electronics to maintain proper front-to-rear brake bias.

STREET KIT FEATURES:

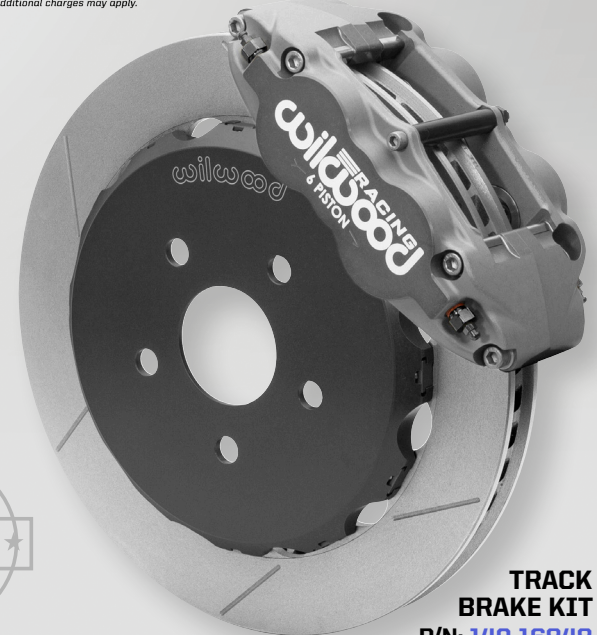

- Forged aluminum six piston **Superlite** calipers with differential bores for even engagement
- Big 327mm (12.88") x 28mm (1.10") vented rotors for greater brake torque and more thermal capacity
- High-performance, low-distortion proprietary iron alloy rotors with 48 cooling vanes, mounted to forged aluminum hats
- Offered in black or red powder coat, and 22 additional color options
- Rotors offered with GT slotted, or SRP drilled and slotted faces

RACE KIT FEATURES:

- **Superlite/ST** six piston race calipers with two-piece Thermlock® thermal-barrier pistons
- Type-III hard anodized inside and out for durability and wear resistance
- **Spec37** iron alloy low-distortion, high-performance rotors with 48 directional cooling vanes
