

BILLET SUPERLITE 6 & 6R CALIPERS

Superlite 6 Lug Mount:

The Superlite 6 billet six piston caliper with “Big-brake” styling meets the high performance demands of today’s tire, wheel and suspension technology. Utilizing NASCAR Championship know-how, this is the first high production billet six piston caliper designed specifically for High Performance, Muscle Car, Hot Rod, Pro Touring and Sport Sedans.

Using advanced solid modeling and stress simulation technology, this high strength, ultra rigid billet aluminum package weighs in at just over 5 pounds and includes differentially positioned deep cup stainless steel pistons for improved heat resistance, pedal response and pad wear. Anti-rattle pad load plates are fitted for quiet operation and smooth braking. Pad changes are fast and easy; remove one bridge bolt and the brake pads are out. A high luster black anodized finish resists corrosion and preserves the caliper’s good looks. Additional features include full CNC machining, protected bleed screws and fluid transfer tube, Grade 8 and aircraft hardware and 1/8-27 NPT fluid inlet.

Superlite 6R Radial Mount:

Our six piston radial mount Superlite 6R caliper offers the same performance characteristics as the lug version, only in a radial mount design, permitting versatility in mounting applications and weighing in at just 4.9 pounds.

Brackets are available for the Superlite 6R in a wide range of rotor diameters and mounting configurations to accommodate mounting the 4.86” radial mount pattern, including a 3.5” Superlite lug, 5.25” GT lug and a variety of stock OEM spindle applications.

Polished Superlite 6 Lug Mount:

The polished Superlite 6 caliper incorporates all of the high performance features of the Billet Superlite 6 but in a brilliantly polished finish.

The machining versatility of our CNC equipment sculpts a caliper that enhances wheel and suspension detail for that show car look without sacrificing any performance characteristics.
