

FOR IMMEDIATE RELEASE:

Wilwood introduces new Compact Combination Master Cylinder

Camarillo, CA • September, 2014

Wilwood is pleased to announce that Compact Master Cylinders are now available with a 3/8-24 UNF Banjo-style fluid outlet to accompany the already available 1/8-27 NPT outlet style.

Available in a wide range of bore sizes in either flange or side mount configuration, these compact master cylinders provide all the same performance characteristics of larger body master cylinders, but in a compact design.

Units are packaged in kit form with all the necessary components to accommodate direct or remote mounting of the reservoir, or offered as stand-alone master cylinders.

The black E-coated aluminum body resists corrosion and maintains a tough long lasting finish. Master cylinders come conveniently and attractively packaged with everything necessary for a smooth installation.

M.S.R.P. begins at \$85.95.

Wilwood has been expertly designing and manufacturing high-performance disc brakes in the USA since 1977. Engineered and rigorously tested for the track, Wilwood brake components provide unsurpassed quality and performance with sleek, lightweight designs. Wilwood has dominated the motorsports arena for decades, making their street market brakes among the most technologically advanced around.
