

FOR IMMEDIATE RELEASE:

Wilwood Announces New Mini-Sprint Rotor specifically for Keizer Hubs

Camarillo, CA • May, 2015

Wilwood aluminum rotors have become the benchmark standard among sprint car racers at all levels of competition. That same standard of performance is now available for mini-sprints equipped with Keizer aluminum front hubs. This select alloy aluminum rotor is precision machined, anodized, and then combined with a GP200 model billet aluminum caliper and track proven "Purple" compound aluminum rotor pads. The results are a high response, long service life, lightweight and very affordable package. Order rotor part number 160-13712, caliper part number 120-12178 and pad part number 150-12270K.

M.S.R.P. for these "Made in the USA" components begins at \$46.73 for the rotor, \$98.93 for the caliper, and \$47.94 for a box of four pads.

Mini-Sprint Rotor

GP200 Caliper

Wilwood has been expertly designing and manufacturing high-performance disc brakes in the USA since 1977. Engineered and rigorously tested for the track, Wilwood brakes provide unsurpassed quality and performance with sleek, lightweight designs. Wilwood has dominated the motorsports arena for decades, making their street market brakes among the most technologically advanced around.
