

FOR IMMEDIATE PRESS RELEASE:

New Superlite 4R Rear 13" Disc Kit with Internal Parking Brake from Wilwood

Camarillo, CA December 1, 2011

Wilwood [new brake kit](#) is designed to meet the form and function demand generated by big wheel and tire packages on typical "Detroit Muscle" rear wheel drive axles. The increased stopping power generated by the four piston calipers, high performance pads, and 13.00" discs, restores the brake leverage and aesthetic appeal that is lost when installing big diameter wheels and tires over the original small diameter brakes. The internal shoe system provides a simple bolt-on solution for parking brake installation when converting to rear wheel discs. The machined billet calipers and cross-drilled and slotted discs provide a custom, high-tech competition appearance that is sure to please the most discriminating enthusiast.
